

Biosphere: An Experience in Nerve Chilling Suspense

Filesize: 2.37 MB

Reviews

This ebook is very gripping and fascinating. Sure, it is engage in, nevertheless an amazing and interesting literature. It is extremely difficult to leave it before concluding, once you begin to read the book.

(Ms. Ora Buckridge)

CreateSpace Independent Publishing Platform. Paperback. Book Condition: New. This item is printed on demand. Paperback. 204 pages. Dimensions: 9.0in. x 6.0in. x 0.5in. Biosphere The structure and composition of the Biosphere is a floating spatial organic matter with plasma. The stage of cellular tissues begins with a slimy mass of protein matter. This organic matter had no freezing or melting point while the equilibrium is attained keenly by the sphere. The bio-protoplasmic sphere(Biosphere) is wrapped in a polyethylene polymer containing waxes, pectin, cellulose and amino acids. These organic substances are capable of deriving and transmitting energy from any source with caloric transmittal and kinetic potential. The transmission of electromagnetic waves could travel through space in a supersonic speed. The spatial location of the sphere is susceptible to the suns radiant energy. Thus during peak energy levels as the sun radiates through space, the bio-protoplasmic sphere collects the thermal energy of its rays and store it into the mammoth organic mass. During the accumulation, a latent pressure is brewing as the molecular structure of the organic substances is excited. The caloric value of energy as felt by its most sensitive nerve fibers and sifted into its composite organic mass density as stored is 2.0×10^7 calories per cycle per second of the suns radiation with a pressure equivalent to 5.2×10^7 psi. With these thermal and pressure energy, the sphere is capable of transmitting an electromagnetic wave and spatial force energy through space per second per cross sectional area of a magnetic receptor. And what happens when the mind-therapy session of a psychologist doctor transforms the genetic cells of a human brain tissue into becoming highly magnetic that in specific occurrences could transmit electromagnetic waves into space attracting a vulnerable spot on the brain tissue of an unsuspecting...
