URBAN ENVIRONMENTAL MANAGEMENT AND TECHNOLOGY (HARDBACK)

DOWNLOAD

Springer Verlag, Japan, Japan, 2008. Hardback. Book Condition: New. 2008 ed.. 244 x 168 mm. Language: English . Brand New Book. The environmental aspect of cities is nowadays well recognized as a critical element of urban development, management and regeneration. There are various environmental issues related to cities, and they have been analyzed in an individualized manner. Many types of technologies, such as wastewater treatment, have been developed to solve particular environmental problems. However, many of these problems are related to each other, and social and economic aspects are also important for urban regeneration. A holistic view combining knowledge of various urban environmental factors such as water, heat, energy, air, materials and waste, and a practical approach based on such understandings are essential to manage contemporary urban environmental issues, from a local scale to a global scale. The University of Tokyo has been conducting the 21st Century COE (Centers of Excellence) Program on Sustainable Urban Regeneration. Transdisciplinary courses have been offered for graduate students from the departments of Urban Engineering, Civil Engineering and Architecture to present a holistic view of urban regeneration. This book is based on the contents of the transdisciplinary course on environmental management and technology. I hope that its content will be useful for undergraduate and graduate students and for experts and policy makers in developed and developing countries. Shinichiro Ohgaki Project Leader, COE Program on Sustainable Urban Regeneration The University of Tokyo Contents Preface v Part I Water Environment 1. Water Management in Sustainable Buildings .3 Motoyasu Kamata and Masayuki Mae.
